CONTRACT CHANGES

CHANGES TO THE NEC4 ECC CONTRACT DOCUMENT

**AN ONLINE COURSE ON
CHANGES TO CONTRACTS**

OVERVIEW

The NEC/ECC contract is a contemporary contract which embraces project management tools. The contract is designed to be as flexible as possible and is written in ordinary language to make it easier to understand by people not used to formal contracts and whose first language is not English. Perhaps the most important characteristic of the NEC/ECC is the stimulus to good management.

The NEC4 Edition was released in July 2017. NEC4 has taken the successful NEC3 contract suite and enhanced it, with some new features and some new forms of contract. All of the changes are a direct result of feedback from industry, to support

methods and provide solutions which Clients are demanding. The Engineering and Construction industry has made improvements in the way projects and work programmes are procured and delivered.

This innovative self-paced online learning course will deal with the newly published NEC4 major changes and additions from the NEC3 to the NEC4, looking at general changes such as terminology, schedule of cost components and specific altered clauses such as the programme, payment and dispute avoidance.

The two new forms of contract, names the Design, Build and Operate Contract (DBO) and the Alliance Contract (ALC) will be discussed in detail.

Case studies and quizzes are utilised to apply the learning of the courses syllabus encouraging participation of all delegates.
